

PharmaPack

developes and distributes packaging products to companies
within the pharmaceutical and biotechnology industries.

PharmaPack Plastic AB is a subsidiary company of PharmaPack AB

PharmaPack has leading companies as its suppliers

MGlas AG

Manufactures primary packaging and injection systems made from tubular glass for the pharmaceutical industry. More than 400 employees produce around 1 billion glass products per year. MG produces to high GMP-standards:

- Vials up to 125 ml
- Ampoules
- Pre-fillable injection syringes
- Carpules
- Uni-dose containers
- 2-Chamber cylinders

www.mglas.de

Nalge Europe Ltd

Manufactures plastic packaging including both sterile and non-sterile products. The units vary from 0,5 ml to 50 litres in HDPE, LDPE, PETG, PP, specialty films and other resins. Nalgene products are leak-proof and fulfil the United States Pharmacopeia Class VI, non-cytotoxic, USP 24 < 611 > and other tests.

Schreiner GmbH & Co. KG

Manufactures labels for vials, syringes, ampoules and other medical packaging. They also produce special customer applications with additional functions, e.g. integrated booklets and detachable labels.

The developments within areas such as "Logidata" transport labels and "Prosecure" safety labels are becoming increasingly important due to the wide range of applications offered by counterfeit protection and transponder technology.

PharmaPack – your partner for developing packaging systems.

PharmaPack provides the pharmaceutical companies in Scandinavia with primary and secondary packaging materials. Our customers are in the medical and diagnostic industries but, with the rapid development in medicine, our customer base has expanded to include companies in biotechnology and medical device technologies.

Working closely together with our supply partners, our task is to help our customers to find and develop the most suitable and complete packaging systems.

PharmaPack understands packaging, we provide information about standard solutions, we know what authorities require and we are aware that packaging must be able to be handled practically and effectively. We devise cost-effective solutions and systems quickly - a necessity in an expanding market with a high level of competition and great expectations.

PharmaPack provides a strong link between companies that produce packaging materials and companies with various substances and other medicinal products that need packaging. We have also become a working partner in the development of new systems and product ideas.

Our competence derives from our long experience, established technical knowledge together with our close co-operation with both customers and suppliers.

Our customers are in the following industries:

Pharmaceuticals
Diagnostics
Medical disposables
Veterinary medicine
Biotechnology
Medical device technology

We offer a wide product range including:

Containers of tubular glass
Plastic packaging
Self-adhesive labels
Injection needles
Screw caps
Aluminium caps
Rubber stoppers
Drug delivery injection systems

PharmaPack was established 1944. Since 1988, under new ownership, the company has focused on a dynamic new direction. PharmaPack is today an expanding company with eminent suppliers and competent partners. The company has their premises at Ingenjörscentrum in Sollentuna, near Stockholm-Arlanda.

Our quality management system is certified to ISO 9001:2000.

PharmaPack Plastic AB is a subsidiary company of PharmaPack AB

PharmaPack Plastic AB

from concept to completed solution

PharmaPack Plastic AB specialises in plastic packaging and tools for manufacturing, packaging of medicinal products and sterilisation. Apart from supplying primary packaging, we are also frequently entrusted to produce complete packaging systems. This is performed in close co-operation with both suppliers and customers where PharmaPack Plastic, with their competence, contributes to the creation of effective and competitive packaging systems. Besides offering packaging materials we also provide contract packaging and distribution.

Our main products are: plastic bottles and containers, Cubitainers, equipment, rubber and plastic closures, labels, cartons and inserts as well as vacuum moulded blister packs and inserts.

Our main suppliers are:

Heinz Plastics GmbH

In 1955, became the first German glassworks to commence plastic production. They produce packaging in many different types of materials for liquid and dry products using the production methods Blow Moulding (BM) and Injection Blow Moulding (IBM). In 2001 a new factory including clean room facilities for production class C = 10 000 was established in Neuhaus.

Tommy Nielsen

Manufactures packaging machines and tools for more than 40 countries. They provide a complete service for blister packaging consisting of:

- Blister-pack machines for semi- and fully automatic production
- Roller puncher for stamping of packaging products
- Tools for blister-packs specifically designed for the customer's products
- Foil and other materials cut to the correct measure for blister-pack production
- Contract packing in blister-packs
- Specially equipped machines for clean room production
